

Eris A.

Bun divider-rounder

Performances

- From 14 to 52 divisions, depending on models
- Supplied with 3 synthetic dividing & moulding trays

The advantages

- Size and weight of regular dough pieces
- No unnecessary pressure on the dough
- Easy to clean
- Manual adjustment of the weight depending on the type of dough

Use

The ERIS A. bun-divider is designed to cut and shape the dough into round dough pieces in the same work cycle.

Operating principle

Once weighed, the dough is placed on a division disk placed between the «head» of the machine and the platform. The «head» is then lowered and blades come down to cut the dough. Then, in a few movements, the oscillating platform forms the dough into perfectly identical round dough pieces. The number of divisions and weight of the dough pieces depend on the machine selected.

Specificities of the "Semi-automatic" model:

- Division device by hydraulic jack and motorised rounding oscillating platform controlled by a lever.
- Manual adjustment of eccentric movement with the operating handle.
- Setting with volume/ weight bar depending on dough type. .
- Rounding and pressing time is adjusted by the operator.
- Dividing disc can be cleared & tipped to the front for cleaning.
- The dividing head & dividing + moulding trays are interchangeable from one model to another, whilst keeping the same machine body

Construction

- Cast iron base on castors
- Aluminium alloyed and Teflon coated dividing disc
- Aluminium alloyed oscillating platform
- Stainless steel knives
- Mechanical pressing and cutting movement
- Electro-mechanical rounding
- Quiet belt drive
- Removable pressing handle
- Supply voltage : 400 V 3 PH 50 Hz
